

## **Tallinn Tram Weather Report**

*Aleksandra Ianchenko, Tallinn University/Abo Akademi University*

What do you do while waiting for the tram?

This summer I visited all 43 tram stops in Tallinn and observed what people do there. I have seen them scrolling phones, eating, taking a nap, chatting and drinking in big companies. Tram stops become for me vantage points for urban social life. The variety of peoples' activities, my interactions with them, sounds of passing trams, different cityscapes and changeable summer weather created atmosphere of Tallinn along the tram tracks which I captured in 318 sketches.
